

# What type of sewing are you planning to do?

THE TYPE OF SEWING YOU PLAN TO DO WILL DETERMINE WHAT YOU NEED YOUR SEWING MACHINE TO DO.

1

## TRADITIONAL OR DOMESTIC SEWING MACHINE

This is the type of machine generally found in homes for everyday use. Traditional sewing machines are used for making clothing and for general craft work.

2

## SERGER MACHINE

The serger is used for finishing garments in a professional manner. It cuts the seam allowances clean and then wraps its multiple threads around the raw edge to finish it.

3

## COVER HEMMACHINE

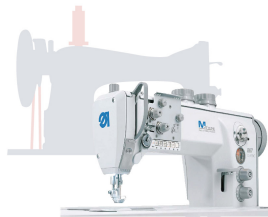

This machine produces the double stitch seam that can stretch, like the ones found at the hem of a shirt.

4

## FLAT BED SEWING MACHINE

Used for simple projects needs only lock stitch or chain stitch patterns. Used for garment sewing.

5

## POST BED SEWING MACHINE

Industrial sewing machine used for making shoes and bags.

6

## CYLINDER BED SEWING MACHINE

Industrial sewing machine used for sewing tubular parts, like trouser legs and sleeves.
